## ABOUT ME

I'm Inbal Raphael, a graphic designer, live in Tel-Aviv.

I've been drawing ever since I could hold a pencil. I love the art design and have been working with different aspects of it throughout the years.

Fascinated by science, life also brought me to study Biotechnology and Environmental Science, and I found myself working in the pharma industry for the past 10 years, as a department manager.

Fortunately, I got the courage to leave it all behind and follow my greatest passion. And here I am now. A designer. Need nothing but my loyal computer.

In my work as a designer, I am always drawn to beauty, simplicity, minimalism and functionality. I believe that design should be powerful enough, to speak on its own.
